<Kamal Khanal> Full Stack Web Developer - React /Next.js

📞 0415 837 036 ✉ kamalkhanal@gmail.com 🌐 kamalkhanal.com

💡 Summary

Full-stack developer with a strong frontend focus and a passion for building performant, modern web applications. I specialize in **React**, **Next.js**, Supabase, and Stripe integrations — with a proven ability to deliver complete SaaS products from concept to launch. With deep freelance and startup experience, I excel in building intuitive user experiences, scalable backends, and polished developer-first tools.

⚒ Technical Skills

Languages: JavaScript (ES6+), TypeScript, SQL

Frontend: React, Next.js, Tailwind CSS, Shadcn/ui

Backend: Node.js, Supabase, PostgreSQL, Prisma, REST APIs

Tools: GitHub, Vercel, Netlify, Figma, REST APIs, VS Code

Other: SEO, WordPress (Elementor, Woocommerce), Shopify, Agile Development

💼 Experience

Founder / Full-Stack Developer – WebQuick
Mar 2024 – Present | Remote
• Architected and launched a fully functional website builder platform for tradies
• Built user onboarding, role-based auth, dashboard UI, and Stripe
• Designed the marketing site using WordPress and integrated with React dashboard

Web Developer – Show Tile
Jun 2023 – Mar 2024 | Bankstown, NSW
• Rebuilt company e-commerce store using React frontend with WordPress API
• Optimized Core Web Vitals and automated inventory sync
• Improved user experience and reduced bounce rate by 35%

Freelance Full-Stack Developer – SiteGuru
2019 – 2023 | Sydney, Remote
• Delivered SEO-optimized websites and marketing automation for small businesses
• Managed Google Ads campaigns, landing page optimization, and analytics dashboards
• Built client websites using WordPress, WooCommerce, and Elementor

🚀 Projects

Kamal AI – AI Blog Generator (React, Supabase, OpenAI API) - kamal.cc
• AI-powered content creation tool generating SEO-optimized blog articles from input.
• Built using React and TailwindCSS with real-time data storage in Supabase.
• Users can generate, save, and manage articles from their dashboard.
Demo: https://kamal.cc

WebQuick – Website Builder for Tradies (Next.js, Supabase, Stripe) - webquick.com.au
• SaaS platform enabling tradies to launch modern websites in minutes with zero code.
• Integrated Stripe for subscriptions and Supabase for database/auth.
• Features include role-based access, onboarding wizard, and user dashboards.
Demo: https://webquick.com.au

InvoicerPro – Freelancer Invoicing SaaS (Next.js, Prisma, PostgreSQL)
• Built full-stack invoicing tool with PDF generation and client/project tracking.
• Implemented Stripe subscriptions and multi-step invoice creation flow.
• Responsive UI with invoice status boards and downloadable PDFs.

PromptCrafter – AI Prompt Marketplace (Next.js, Supabase, Stripe)
• Marketplace for buying/selling AI prompts with seller profiles and ratings.

DevStore – Headless E-commerce Storefront (Next.js, TailwindCSS)
• Developed a modern storefront with custom cart, checkout, and CMS integration.
